BENEFITS OF ENERGY EFFICIENT LED LIGHTING

- **5 Years** Maintenance Free
- **Energy** Efficient – Uses up to 80% less energy lowering energy bills
- **Durable** – highly resistant to vibrations and temperature changes.
- **Environmentally** friendly
- **Instant** illumination
- **Lower** operation temperatures – LED Lights Emit no UV rays or infrared radiation
- **Improved** productivity – workers can be 6-8% more productive under LED light due to less fatigue and eye strain
- **Insurance** –lower operating temperatures allow some insurance policies to be re-addressed

TESTIMONIALS

"Thank you for your advice and professional approach with the energy saving upgrade in the B1 & B2 car parks. Your guys were a pleasure to deal with and we were extremely pleased that the project was completed within the said 3 week time frame.

The car park is considerably brighter and the energy savings have paid off since day one of the upgrade. Looking forward to DNK undertaking the centres mall lighting upgrade within the near future."

Robert Mandrovski
Associate Director
Auburn Central
Colliers Real Estate Management

TESTIMONIALS

"I have and will continue to recommend Secure Intelligence Solar to anyone that is looking to install solar power to reduce their electricity bills".

Con A.
Fuel Station Owner
Mt. Evelyn

"A quick note to say thanks. Our installation was speedy, smooth and professional. Your on-site guys knew what they were doing and on our estimate of \$500-\$600 savings per month, we will achieve more than 25% return for the lifetime of the system"

Jim L.
