

SUPPLY CHAIN & LOGISTICS MANAGEMENT

EXECUTIVE EDUCATION

LEAD FACILITATORS:

Dr David Parker and Liam Stitt

COURSE OVERVIEW

Competing in a global market requires companies to manage their supply chains efficiently. This course will help strategic decision makers and operational managers in both domestic and international markets to manage logistics successfully across their business.

You will learn how to create lean systems and organisational agility and how to solve problems using a range of practical tools. It will demonstrate how to put in place seamless processes for manufacturing and logistics, redefine supply chain processes and optimise resources. It will also cover topics including dynamic new product development, stock, transport and total-cost function modelling, innovation leadership and sustainable operations.

The course will enable you to identify the current challenges facing supply chain managers and the issues within your own organisation, and learn about best practice and future directions in supply chain management.

COURSE FEE:

\$4,960

COURSE DATE:

19 - 23 August 2013

VENUE:

UQ Business School Executive Venue
Central Plaza One, 345 Queen Street, Brisbane

KEY BENEFITS

- Discover the keys to successful supply chain management
- Develop tools and models to help you examine your current system
- Transform your organisation to a process-orientated system
- Improve your performance in international and domestic markets
- Learn how successful leaders engage others in the supply chain process
