The 2006 National Supply Chain & Logistics Awards

2006 Lifetime Achievement Award in the betterment of the Transport and Logistics industry

In 2006 there were two presentations to members who have contributed significantly to either Institute over many years.

Inaugural Winners 2006:

Lifetime Achievement Awards were made by the Chartered Institute of Logistics and Transport (CILTA) to Allan Meares of Queensland Transport and William Harris OAM, who has been an active member of the Institute since 1964.

After the awards CILTA president John West announced his organisation would hold another conference and awards in partnership with the SCLAA, in 2007 in Melbourne.

"Because of the success of this event in bringing the industry together and raising the profile and issues in Logistics, we have agreed to hold this event jointly in 2007," West says.

"We hope to develop these two organisations together to lead transport and Logistics in our country."

The Supply Chain & Logistics Association of Australia (SCLAA) and the Chartered Institute of Logistics and Transport Australia (CILTA) proudly partnered to present the Australian Supply Chain and Logistics Awards in Perth, Western Australia at the end of 2006. Both associations would like to extend their sincerest gratitude to the following companies as without them the Awards evening could not have been made possible. Crown lift trucks, Dexion, Dematic, Loscam, MACK trucks and Supply Chain Review. The partnership of the SCLAA and CILTA, the two pre-eminent associations representing professionals working in, and in support of, the Supply Chain and Logistics Industries, make these proud and historic Awards unambiguously the most prestigious and influential in the Industry.

Chairman of the judging panel, John Edhouse, says the "extraordinary high standard of submissions from every state showed the industry was in good shape".
National Supply Chain Awards cont...

The 2006 National Supply Chain & Logistics Awards

2006 Mack Trucks Australia Young Transport and Logistics Professional Award

Winner 2006: Rhiannon Russell from Western Australia

The purpose of this award is to provide incentive for, and recognition of, achievement of individuals who are actively involved in day-to-day operations and development of a transport or Logistics organisation in Australia. The award is not limited to a particular discipline in transport or Logistics but may relate to areas including, but not limited to, engineering, planning, policy, Logistics, finance, administration or management. Candidates must be under 30 years of age as at 30th June in the year of nomination.

The eight finalists are all worthy winners of this award and all of them met the requirements for this award. With less than 5 points separating the first four, the judges were very impressed with the quality of the submissions and the candidates and had a challenging task to identify the winner.

THE FINALISTS WERE:
- Scott Britton QLD
- Jessica Brocklebank NSW
- James Griffiths NSW
- Evan Knapp SA
- Matthew McKibbin SA
- Rhiannon Russell WA
- Ben Stokes VIC
- Michael Williams WA

Rhiannon Russell demonstrated high leadership qualities, an ability to implement and manage projects and programs with a high level of creativeness whilst making a significant contribution to the Logistics industry. A mature person, Rhiannon has provided benefits to the industry in the professional and personal development areas of activities and has the passion, attributes and capacity to be an outstanding ambassador for the industry.

2006 Transport and Logistics Achiever of the Year Award

Winner 2006: Robert Harris from TNT Logistics

The aim of this award is to encourage and acknowledge the outstanding achievement of an individual who is actively working in an organisation within and/or the transport and Logistics industries.

The award is not limited to a particular discipline in transport or Logistics but may relate to areas including, but not limited to, engineering, planning, policy, Logistics, finance, administration or management. The nominations for this award were based on outstanding achievement of an individual in transport & Logistics.

The competition was close with some outstanding nominations being received. All finalists met the criteria and are to be complimented on their submissions.

Robert Harris, from TNT Logistics, demonstrated an ability to bring together a wide range of services both locally and internationally and using his skills, providing a significantly improved solution for the client and secured a long term contract for his employer.

THE FINALISTS WERE:
- Phil Baker SA
- Matthew Collins NSW
- Robert Harris VIC

2006 Transport and Logistics Achievement of the Year Award

Winner 2006: Oakey State High School, in Queensland

For their efforts in adopting the transport careers project, encouraging students to do work experience and training with transport and Logistics companies.

The purpose of this award is to acknowledge an outstanding, innovative contribution to a development in the transport and Logistics industries by an organisation or an individual. The nomination will clearly describe the nature of the achievement or proposal, the circumstances in which it was put into effect, the extent of the individual involvement, the scale of the application, the results achieved and the significance of the achievement.

The nominations covered a diverse range of achievements including road, rail, air and secondary education providers. This was a difficult and challenging category to judge with such a broad range of nominations that required the judges to consider a number of very different innovative contributions to the industry.

The nominations were of a very high standard and all nominees are to be commended.

THE FINALISTS WERE:
- Adelaide Airport Ltd SA
- Oakey State High School QLD
- Queensland Rail National QLD

The Oakey State High School nomination developed a program to allow young people direct from secondary school to enter the industry under traineeships and apprenticeships with local businesses under a partnership arrangement.
2006 Storage and Handling of Materials Award (Comino Trophy)

Winner 2006: Repco for their Queensland Distribution Centre

For significant achievements in the techniques and technology of materials storage and handling at any stage of the Supply Chain.

Technology covers equipment and design techniques, including facilities design, and associated information and control systems. Improvements and/or innovation with particular regard to impact on organisational objectives and to contribution to the wider field of materials storage and handling must be demonstrated.

The submissions came from both industrial companies and retailers and presented the judges with a wide range of storage and materials achievements in the techniques and technology applied in the materials and storage elements of Supply Chain operations.

All of the nominations presented new techniques and demonstrated the positive impact on the use of the selected technologies on their business and the impact on customers and suppliers.

THE FINALISTS WERE:
- Dick Smith Electronics, NSW
- Repco QLD Distribution Centre, QLD
- The Reject Shop, VIC

Repco demonstrated the value and impact their new distribution centre materials handling and storage processes which had a key role in reducing their operating costs, increasing productivity with higher service levels and reduced inventory.

2006 Information Management Award (Len Smith Trophy)

Winner 2006: Sunshine Technologies

For their world-first id-DNA RFID solution for pathology.

For significant achievement in the use of communications, information management, technology and e-business in any aspect of Logistics and Supply Chain management, with particular regard to the added value produced by the achievement.

The judging panel received a number of very interesting nominations to review. They included unique applications of voice picking technologies, new key performance indicator (KPI) reporting processes, applications for mobile devices, modelling techniques for vehicle stability and RFID products.

In addition to the normal judging criteria, the judges also weighted their decision on submissions that showed both a high degree of innovation/collaboration and that indicated a strong commercial return on investment.

Sunshine Technologies demonstrated that collaboration between two parties has combined RFID technology with DNA profiling to provide a unique and innovative solution to track and trace forensic samples in their Supply Chain.

THE FINALISTS WERE:
- Agilistics Pty Ltd, VIC
- Queensland Rail, QLD
- Sunshine Technologies, QLD

2006 Environmental Excellence Award (H.A. Ritchie Trophy)

Winner 2006: Veolia Environmental Services

For their project to turn green waste into energy.

For significant achievement in any area of environmental concern including traffic congestion, packaging or waste disposal, recycling, and energy consumption. Achievement in the specific application and in its wider applicability must be demonstrated thereby promoting environmental best practice.

The judges decided that there were only two nominations that met the criteria for this award which is based on a significant achievement in any area of environmental concern.

Veolia Environmental Services demonstrated an ability to bring together a wide range of technologies and services both locally and internationally to provide a significantly improved solution in the reduction of waste through the utilisation of waste to produce energy.
The 2006 National Supply Chain & Logistics Awards

2006 Supply Chain Management Award (Doug Beattie Trophy)
Winner 2006: Virgin Blue for re-engineering their Supply Chain
For significant achievement in managing the integration of Supply Chains.
This could be functional integration within an organisational Supply Chain or more widely across Supply Chains involving several organisations that have formed trading partnerships or alliances. Collaboration and added value across the Supply Chain, achievements gained through outsourcing and the development of new business models could also be demonstrated.

The judging panel received a wide range of different submissions to consider. The nominations came from government agencies, Logistics providers and retailers.
The key focus of this award is the management of integration of Supply Chains and all submissions were of the highest quality.

THE FINALISTS WERE:
Department of Innovation, VIC
Queensland Rail National, QLD
Virgin Blue, QLD

Virgin Blue demonstrated the value and impact their re-engineered Supply Chain has had on their business and on their customers.

From Andrew David, Virgin Blue Chief Operating Officer:
"Winning such a prestigious award is a clear recognition of the high quality of Virgin Blue's team. Personally I am very pleased, this is an outstanding result. We have come a very long way from three years ago when it was all hands to the pump. The list of achievements this year is long and impressive."

From Radar:
"Receiving the award is recognition for endless hard work by a lot of people. The supply chain management changes that have been implemented during the past 3 years link Virgin Blue's strategic objectives to the day-to-day business, and importantly, provide the cornerstone for future growth. Since the award, Virgin Blue announced that it will introduce a fleet of Embraer E170 and E190 jets to complement the Boeing existing fleet. The supply chain business process transformation that has been achieved and which continues to take place will ensure the new fleet is successfully entered into service."

2006 Manufacturing Logistics Award (John Thompson Trophy)
Winner 2006: TNT Logistics (Australia) Pty Ltd and Mitsubishi Motors Australia Limited for their parts distribution collaboration.
For significant achievement in any aspect of Logistics associated with manufacturing, with particular regard to the effect on cost and efficiency of the total manufacturing process and the integrated Supply Chain.
This may include the design or process re-engineering of Logistics flows in manufacturing facilities, integrating Supply Chains, plant layout, forecasting and scheduling production.
In the opinion of the judges there was only one entry that met the criteria and after close scrutiny, the judges considered that this entry was indeed worthy of this award.
The winning submission was a joint nomination between a service provider and their client which demonstrated the benefits of a close and open working relationship between the two parties the realised a significantly improved solution for the client at lower cost and further secured this close long term working arrangement.

THE FINALISTS WERE:
Department of Innovation, VIC
Department of Public Works QLD Purchasing, QLD
TNT Logistics (Australia) Pty Ltd, QLD

2006 Training Education and Development Award (Peter Gilmour Trophy)
Winner 2006: Victoria's Department of Innovation, Industry and Regional Development
For their support of industry research, training programs and career forums.
For significant achievement in any aspect of training, education, or the development of people which is relevant to Logistics and the Supply Chain.
The nominations came from government agencies, Logistics providers, industry associations and secondary education providers.
The key focus of this award is a significant achievement in any aspect of training, education or people development in the Logistics and Supply Chain. All submissions were of the highest quality.

Victoria's Department of Innovation, Industry and Regional Development demonstrated the value and opportunity for people at all levels to undertake a career in the Logistics and Supply Chain industry with clear direction to all potential new employees across the whole Supply Chain at all levels.

THE FINALISTS WERE:
Department of Innovation, VIC
Department of Public Works QLD Purchasing, QLD
TNT Logistics (Australia) Pty Ltd, QLD
The 2006 Australian Young Transport and Logistics Professional Award

Rhiannon Russell from SKM was awarded with the Australian Young Transport and Logistics Professional Award, sponsored by Mack Trucks. The purpose of this award is to “encourage and acknowledge outstanding achievement of an individual working in the transport and/or Logistics industry.”

Rhiannon won the state award in 2005 and was assessed by a panel of judges against finalists from other states through a written submission and interview process for the national awards.

The judging panel said Rhiannon demonstrated high leadership qualities, an ability to implement and manage projects and programs with a high level of creativeness whilst making a significant contribution to the transport and Logistics industry. She was also assessed as providing benefits to the industry in professional and personal development activities and has the passion, attributes and capacity to be an outstanding ambassador for the industry.

Rhiannon said she was very pleasantly surprised by her win given the impressive field of finalists from around Australia.

Rhiannon completed her Bachelor of Science Degree with First Class Honours in Sustainable Development in 2003. During her university studies, she developed a particular interest in the potential for a sustainable transport network in Perth, supported by a sustainable pattern of urban growth and development. Her effort and enthusiasm was proven when she was presented with the Minister’s Award for Planning Excellence for her thesis on transit-oriented development and the Perth to Mandurah rail line.

Rhiannon entered the transport industry as a research assistant with the Department for Planning and Infrastructure in 2003 and is currently working as a transport planner at the global professional consultancy firm Sinclair Knight Merz (SKM). Rhiannon consults to both private and public sectors on transport matters ranging from impact assessment to strategic policy for passenger and freight transport.

As is evident from her research and recent project work, Rhiannon is particularly interested in the relationship between land use and transport and how this may be influenced to produce more sustainable outcomes for both sectors. She sees sustainable development, and particularly transport, as a critical element in Australia for this and future generations and says it is this ability to have a genuine impact that makes her so interested in working within the transport sector.

Rhiannon is involved in the WA section of the Future Leaders Group (supported by CILTA and SCLAA), which helps to promote the transport industry to other young people entering or already in the workforce. Through this group, she welcomes the opportunity to speak to young people about her experience within the fields of transport planning and sustainability and wishes to “encourage students to consider the wide scope of employment within the transport sector, its importance to our urban areas and economy and the opportunity to make a tangible difference to the city they live in.”
Supply Chain WA 2006, held in Perth, was well attended by delegates from local and interstate. There were a variety of trade exhibitions showcasing a diverse range of organisations and projects in the Supply Chain and transport industry. In particular the fresh juice stand was well visited and a refreshing break from traditional displays.

The Conference was opened by John Elliot, General Manager from DOTARS, presenting the significance of AusLink in providing National funding to address the growing freight demand in WA. Greg Martin, Director General of DPI, suitably followed with his opening address on Government priorities in supporting the development of Supply Chain and Logistics in WA.

The sessions across the three streams covered the broad aspects of the Supply Chain and transport industry and reflected the issues and challenges present today. The panel sessions were well attended and provided a great forum to hear industry leaders discuss arising issues and the future trends.

Besides the technical aspects, the Conference provided an excellent opportunity to build networks with people across the industry. It was encouraging to see the promotion of young people in the transport and Logistics industry, with representatives from each State attending the Conference. They took the opportunity to hold a National committee meeting for the new Future Leaders Forum (supported by CILTA and SCLAA), making plans for an exciting year ahead.

After two full days of hearing technical seminars and contemplating industry issues, it was great to be treated to an extravaganza of food and entertainment at the Gala Dinner. Everyone dressed to impress and the three waiters certainly made quite an impression. The night was particularly celebrated by the winners of the Australian Supply Chain and Logistics Awards. A special mention needs to be made about our very own Rhiannon Russell who won the Mack Trucks Young Achiever’s Award. Rhiannon was quite surprised given the impressive field of finalists from around Australia. Well done Rhiannon!

The success of the inaugural Supply Chain WA Conference was a testimony to the joint efforts of SCLAA and CILTA and the hard work behind the scenes are to be commended.
Supply Chain WA 2006
Following the success of last year’s Transport Expo, 2007 renamed event – the Perth Truck and Trailer Show - is tipped to be even bigger and better. The 2007 show will be held at the Perth Exhibition Centre from July 27th to 29th. This will be the first time the event will be held at this premier venue and will allow exhibitors more room to better display their products and merchandise with more flexibility and ease of access for bump in and out.

Visitor numbers increased significantly when the Perth Motor Show first changed to this audience-drawing venue. Visitor surveys also indicated increased levels of satisfaction coupled with a longer average visit time; the Perth Truck and Trailer show is expecting similar results.

Expressions of interest for possible display space are urgently invited. Applicants will be sent a prospectus and exhibitor details pack.

The organiser of the event is comprised of members of the Commercial Vehicle Industry who understand your needs and requirements. This really is a unique event organised by the transport industry, for the transport industry and we hope to see you there!

Expressions of interest for possible display space are urgently invited. Applicants will be sent a prospectus and exhibitor details pack.

TRANSPORT AWARDS

TFWA Awards 2006

Awards recognise transport industry success

A fantastic time was had by all at the Transport Industry Gala Dinner and Awards night at the Parmelia Hilton in Perth. The Awards have now been running for over 10 years and cover various industry categories, all made possible by the sponsors – BP; CGU; WA Driver Recruitment; DOCEP Resources Safety; Max Winkless Volvo and NTI – who support the industry and recognise its increased professionalism.

Nominations
Anyone involved within the transport industry can be nominated for an award. A nomination form addressing the selection criteria is first sent to the Transport Forum of WA and once this has been assessed by the judges, the top three or four are chosen and invited to interview with the panel, which then leads onto further assessment as the judges make their decision. The panel is made up of people within the transport industry and regulatory bodies – from WA Police, Main Roads WA, DOCEP Resources Safety, WorkSafe and the Public Transport Authority.

Although the Transport Forum organises and runs the awards, it does not have a say in the final outcome and the judges’ decision is final.

These are the Award winners and runners up who have been deemed as exceptional representatives for the transport industry:

- BP Professional Driver of the Year went to Mr Don Messenger of Spartan Freightlines and the runner-up was Anthony Bakranich from Cape Crushing.
- CGU School and Community Bus Driver of the Year went to Mr Lance Paterson of Shepherdson Transport and the runner-up was Cheryl Cheetam.
- WA Driver Recruitment Operations Excellence Award went to Mr Norm Higgins of Jetstyle Express and the runner-up was Dave Walters of Sadiërs.
- DOCEP Resources Safety DG Safe Driver of the Year Award went to Mr Nick Kramer of Coogee Chemicals and the runner-up was Dennis Treasure, also from Coogee Chemicals.
- Max Winkless Volvo Outstanding Contribution to the WA Road Transport Industry Award went to Mr Max O’Dea and the runners-up were Stewart Beard of WA Freightlines Group and Heather Jones of Success Transport.
- NTI WA Transport Woman of the Year Award went to Ms Karen-Maree’ Kaye of Westcoast Print and Promotions and the runner-up was Cathi Payne of Payne Haulage. Each Award winner took home a cheque for $1000 plus a crystal gift, Award-specific number plates, a certificate and their name will go on an honour board, located at the Transport Forum of WA.

Congratulations
Don Messenger, who picked up the BP Professional Driver of the Year award, says he was pleased to have won the award after 26 years in the industry, driving various applications over more than seven million kilometres. Don’s commitment to customer service and going that extra mile held him in good stead for the award.

Don has been surprised by the attention the award has brought him, but he thinks the more attention brought to the awards, the better.

“Company’s should be promoting the awards internally to promote higher standards,” says Don.

Don and wife Carol – winner of the NTI WA Transport Woman of the Year in 2001 – say the personalised number plates are a great tool in raising awareness of the awards and promoting the transport industry in a positive light as they attract so much attention and raise questions as to their origins.

Coogee Chemicals had a successful evening with driver Nick Kramer winning the DOCEP Resources Safety DG Safe Driver of the Year award, with work mate Dennis Treasure hot on his heels as the runner-up.

“Coogee Chemicals is thrilled the drivers have the opportunity to be rewarded for their professionalism,” said Rob Hennessey, Transport Manager for Coogee Chemicals.

“We are glad to have drivers of such a high standard. This company demands the best and most dedicated drivers who are mindful of the products they carry. We get some of the best drivers and then provide additional training, but it is the drivers’ attitudes to their work that makes the difference.”

Transport & Machinery magazine’s Karen was also honoured, although very modest about her win.

“It was really unexpected,” she said. “I would like to thank the Transport Forum of WA and the NTI, as well as the judges for choosing me and Nancy Malasits – T&M’s features co-ordinator – for nominating me.”

The award was suitable acknowledgement for Karen’s hard work and dedication. Having been actively involved in the transport industry for almost a decade, publishing Transport & Machinery magazine for the past nine years, arranging the SuperTrucks at Barbagallo and helping initiate industry expositions for the public, Karen knows the issues the transport industry faces and continually strives to promote the industry in a positive light.

“I want people in the industry to know that I am here by choice and I am committed to the industry and its people. Transport and Machinery is a publication for the industry and I want readers to know we are here to help. I really do care and my door is always open.”
SCLAA Members meet two sporting greats

The SCLAA Members in Queensland had the opportunity to hear from Natalie Cook, Olympic Gold medallist - Beach Volleyball, and Scott Tronc, Rugby League State of Origin player at their final event for 2006. A nice way to relax, wind down and enjoy the networking.

Scott Austin, Managing Director of Sunshine Technologies was awarded the Information Management Award. The award was presented at the SCLAA Queensland Chapter Christmas function as Scott was unable to attend the Awards Dinner in Perth. Natalie Cook, Olympic Gold Medallist for Beach Volleyball and a great supporter of the SCLAA attended the function to present Scott with his award. Natalie posed with Scott who had the privilege of wearing her Gold medal from the Sydney 2000 Olympic Games ... unfortunately, Natalie wouldn't swap awards!

2nd & 3rd August 2007
Sofitel Hotel
The SCLAA (VIC) were fortunate to host an industry briefing with guest speaker Paul Ryan who is a Director of Investment Research at Goldman Sachs JBWere, specialising in the Transport & Beverages Sectors.

Paul gave a fascinating insight into how the equity markets are interpreting the dynamic shifts occurring in the transport sector.

The timing of the breakfast could not have been better as it was not only the day that Qantas announced its acceptance of a takeover offer from a consortium lead by Macquarrie Bank, but it also followed Toll Holdings’ announcement the previous day of its planned separation of the Group’s transport infrastructure assets from its network and Supply Chain business.

Paul spoke of the recent merger & acquisition activity in the transport sector globally and the high multiples ascribed to some global purchases. This is partly as result of relatively low interest rates and high levels of liquidity in the market.

Paul advised that they believe there is still further opportunity for purchase by Toll Holdings in Australia as well as overseas.

He also spoke of the success of Brambles in simplifying its business structure and future opportunities in Europe & Nth America.

While the presentation was a key focus, the audience were given a strong opportunity to ask Paul about what the take out is from both the Qantas takeover & Toll Holdings business split.

All in all a great morning in what we need to remind ourselves is very much a leading industry building a competitive advantage in Australia.

Planning for Competitive Connections:

Driving Australia’s Future

At a Breakfast Meeting in late 2006, SCLAA members and their guests heard about some of the infrastructure planning efforts currently being made at both a State and National level.

Mr. Bryan Moulds, the National Executive Director (Sustainable Growth), for the Property Council of Australia, gave an entertaining and motivating point of view of the critical work being done in ensuring Australia’s major infrastructure projects and development policies support sustainable growth. Bryan described a series of existing and planned projects, some of which did meet the targeted ‘sustainable growth’ aims some others met local needs, but a different approach could well have provided a solution that was more economically sustainable.

The importance of this policy advocacy work at State and National levels cannot be underestimated. The aims and targets of this type of work are measured in terms of sustainability, eco-efficiency and liveability outcomes from the built environment for the whole community. I am sure all readers would be able to describe major developments they are familiar with that meet and some that do not meet, these goals.

The SCLAA of South Australia thank Bryan for his enlightening and entertaining overview of the activities of the National Property Council and we wish them well in their for policy advocacy campaigns for sustainable infrastructure developments.
