Mr Mark Skipper
Chairman
Supply Chain & Logistics Association
of Australia
Suite 154
4/16 Beenleigh Redland Bay Road
LOGANHOLME QLD 4129

Dear Mr Skipper

FINALISATION OF ENERGY EFFICIENCY INFORMATION GRANTS PROJECT

Thank you for forwarding the final report and financial acquittal for the Supply Chain and Logistics Association's Energy Efficiency Information Grants project. In accordance with the funding agreement, all milestone reporting requirements have now been met. The final report may be placed on the government's website www.business.gov.au in due course so that the valuable lessons from your project can be accessed by others.

Consistent with the objectives of the programme, the department has engaged consultants *Instinct and Reason* to evaluate how well the programme has performed in empowering small and medium enterprises and community organisations to make informed decisions about energy efficiency.

Instinct and Reason will be contacting you directly to obtain relevant data for the evaluation process. It is important to note that *Instinct and Reason* is a member of the Australian Association of Market and Social Research Organisations (AMSRO) and, as an AMSRO member, it operates within the Market and Social Research Privacy Code. This protects the privacy of individuals and organisations sampled for surveys and guarantees confidentiality of data collected from survey respondents. Should you have any questions about the *Instinct and Reason* evaluation process, please do not hesitate to contact your EEIG project officer, Kat Rajci, on (02) 6243 7621.

I would like to express my appreciation for your work in developing energy efficiency information materials for Australia's supply chain, logistics and transport industry. I know that the fact sheets, guides and case studies you developed will help businesses reduce their energy usage and costs.

My team would appreciate the opportunity to touch base with you periodically to see whether your project has continued and whether your stakeholders have maintained an interest in energy efficiency. This would also provide you with an opportunity to provide feedback and discuss any issues that you may be encountering. Should you have any questions about this, please do not hesitate to contact your EEIG Project Officer.

Yours sincerely

Gene McGlynn
General Manager
Energy Programmes
