

Get Ready to Make your Networking Smarter!

SCLAA is proud to partner with Hiver for the duration of our Awards Gala on 23 November. Hiver is an intelligent event technology offering all attendees a smarter, hands-free way to network, follow-up, and easily connect with the people you meet.

Hiver offers a simple way of spontaneously and intuitively remembering, listing, and summarising all the attendee interactions you have over the course of an event. It also allows seamless and easy follow-up through LinkedIn or by simply sharing your personal contact details.

With Hiver you'll keep the event conversation going by never forgetting another name, knowing exactly where you met someone, or even needing a business card again.

To take advantage of this innovative smart networking tool, please take the following steps **before the day of the event** (this will speed-up check-in on the day):

1. Search for “**Hiver Networking**” in the [App Store](#) or [Google Play](#), download the app, and register your profile (takes seconds);
2. Before the day of the event, ideally, launch the app and go to the ‘**Discover**’ icon. Find your event and click “**I Will be Attending!**”
3. Upon arrival at event registration you'll be given your **Hiver Wearable** (this will discretely attach to your badge);
4. Launch the Hiver app, click “**I'm Here!**” after which you'll be prompted to hold the wearable up to the phone for a few seconds until the pairing is completed. You'll see a green tick mark when Hiver is ready to go.
5. Go **Network and Build** your Hive!

After the event, or on a break, you can return to the app, click into the “**Interactions**” icon, and see a timeline of all the people you met during the event. You'll also be able to make notes within each interaction, set reminders, and connect with your new contacts seamlessly via LinkedIn. Hiver also sends a post-event interaction summary email that you'll have on-hand for reference and reporting, too.

If you get stuck at any time or for any additional questions, support, or to learn more about Hiver solutions, please contact hello@hivertech.com
